

Western New York Remediation Section

Week of March 19, 2014

New Cassel: A meeting with the PRPs to discuss OU1 was held on 3/12. Jennifer is pulling information/data together in response to data presented by the PRPs during this meeting, which they argue demonstrates that there exist upgradient sources of groundwater contamination and as a result any negotiations related to OU1 and OU3 should include a larger group of PRPs (Sylvania, GI, Sultzer-Metco). The information that Jennifer is pulling together will be provided to ORC.
